

Steam Lance

Safely Heat and Clean Process Equipment

Don't let cold weather conditions upset operations in your facility. The steam lance will help keep your process media moving. Prevent work stoppages by quickly de-icing mission critical equipment, process or instrument lines.

This versatile steam lance can even steam clean your process lines and containment vessels.

With your 1-part number order you will receive a fully-tested, ready-to-use solution. Have peace of mind knowing that no field assembly or on-the-fly solution needs to be created that might not meet your required safety standards.

ONE INVENTORY PART NUMBER FOR YOUR STOREHOUSE!

(with 4 ft. and 6 ft. being standards and up to 20 ft available)

“Replacement tips and 1/2” or 3/4” Diameter now available”

Consider how you'd like to best use this tool in the field. Your custom solution may include **hoses, carts, hose reels, different valves** or materials which can allow you to extend its reach or protect components.

CERTAINLY, YOUR FACILITY PLACES SAFETY AND OPERATIONAL EFFICIENCY AS HIGH PRIORITIES. THESE CUSTOM SOLUTIONS CAN HELP YOU REACH YOUR GOALS AND GET THE JOB DONE WELL.

Benefits

- 1-part number for easy ordering
- Quick delivery - comes to your dock ready for use

Safe Product Selection

When selecting a product, the total system design must be considered to ensure safe, trouble-free performance. Function, material compatibility, adequate ratings, proper installation, operation, and maintenance are the responsibilities of the system designer and user.

Applications

- Clean containment vessels
- Instant heating and cleaning of process equipment

Swagelok® Components

- 60 Series ball valve
- Heat shrink entry seal boot
- Insulated tubing
